

KTL Offshore brings you Drill Lines from Remer S.R.L (Italy)

High Quality Drill Lines

Remer S.R.L is an Italian manufacturer that produces high quality steel wire rope.

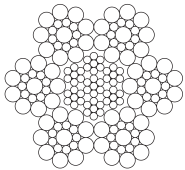

The drill line must be able to withstand high fatigue and abrasion forces and facilitate a reasonable economic cut-and-slip program. Remer's quality control will ensure a high quality product that delivers outstanding rope life.

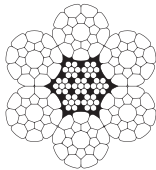

6x19S+IWRC - Standard Drill Lines

Nominal Diameter (mm) (inches)		Weight kg/m	Minimum Breaking Load	
			EIPS	EEIPS
			Metric Tons	
28.6	1-1/8	3.3	58	64
31.8	1-1/4	4.0	72	79
34.9	1-3/8	4.9	87	96
38.1	1-1/2	5.8	104	114
41.2	1-5/8	6.92	119	133
44.5	1-3/4	7.9	141	155
47.6	1-7/8	9.1	162	178
50.8	2	10.3	184	203

Compacted wire rope has the advantage of offering a greater contact area between the surface of the wire rope and the sheave. This results in a reduction in abrasion and stress on the wire rope, increasing rope life significantly. Plastic impregnation increase fatigue life and acts as a shock absorber to improve rope life.

6x19S

6x19SKPL

6x19SKPL+IWRC - High Performance Drill Lines

(Compacted with Plastic Impregnation)

Nominal Diameter (mm) (inches)		Weight kg/m	Minimum Breaking Load	
			EIPS metric tons	EEIPS metric tons
28.6	1-1/8	3.6	64	71
31.8	1-1/4	4.4	79	87
34.9	1-3/8	5.4	96	106
38.1	1-1/2	6.4	114	126
41.2	1-5/8	7.6	136	150
44.5	1-3/4	8.7	158	171
47.6	1-7/8	10.0	178	196
50.8	2	11.4	203	223

Remer drill lines are provided on high strength steel reels and are supplied with Mill and ABS test certification

Remer S.R.L. is authorized by the American Petroleum Institute to use the official API Monogram
